

DEFINITIONS

Following is a list of definitions which should clarify some of the ideas of the "rap."

TECHNO-PENIS

TECHNO-PENIS

 **bougie:** a person whose lifestyle, dress, and social values reflect his/her affiliation with the bourgeoisie, that social class possessing the controlling power in capitalist society.

 **bougie third worlder:** an individual that is a member of a race that has been oppressed historically by white bougies, and nevertheless has decided to embrace and join the white bougies.

 **bougie preppie:** a student that looks at college as a way to gain a managerial position in American capitalism, and has bit the system's version of health and success... hook, line, and sinker.

 **bourgeois vagina:** the dominant sexuality of the bougie woman, characterized by castration and a steadfast identification with the techno-penis. The bourgeois vagina needs to be *entertained* constantly and consciously; it is a huge *suck* for every kind of capitalist commodity, from skyscrapers (techno-penis) to cappuccinos.

 **bourgeois hippie emulation:** a neurotic lifestyle in which a bourgeois individual spends a great deal of money to appear to be a hippie.

 **castration coalition:** an association of so-called radicals in Berkeley, led by castrated males and feminine fascists. Their dominant thought is a confusion of real masculinity and the techno-penis. "Freaked out" by the techno-penis, they support a platform of universal male castration.

 **defense:** a mechanism which is used to keep Primal Pain at bay; the defense system is the outward appearance of feigned health, and is usually what psychologists call "personality."

 **feminine fascism:** the female component of fascism; in its most severe manifestation, the feminine fascist wants to completely appropriate the penis for her own purposes and requires castration as a condition for a relationship with a male.
